Summary

Aspiring Cloud & DevOps Engineer with hands-on experience in AWS, Linux, Git, Jenkins, Docker, and CI/CD automation. Skilled in deploying and managing cloud infrastructure using AWS services, with practical experience in automation and monitoring. Seeking an entry-level Cloud/DevOps role to apply technical skills and contribute to reliable, scalable infrastructure.

Technical Skills

- Cloud: Amazon Web Services (AWS).
- AWS: IAM, EC2, VPC, S3, EBS, EFS, AMI, ALB/ELB, Auto Scaling, CloudWatch, CloudTrail, SNS, SQS, Route 53, CloudFront, Lambda, RDS, ECR.
- Operating Systems: Linux (Ubuntu, Amazon Linux), Windows Server (Basic).
- Networking: TCP/IP, DNS, HTTP/HTTPS, SSH, CIDR, Subnetting, Security Groups, Network ACLs.
- Scripting: Bash (Shell Scripting).
- Version Control: Git, GitHub.
- CI/CD: Jenkins.
- Containerization: Docker.
- Container Orchestration: Kubernetes.
- Infrastructure as Code (IaC): Terraform.
- Monitoring & Logging: Prometheus, Grafana, Splunk.

Projects

AWS Cloud Storage Automation using EC2, EFS & S3

- Launched and configured an Amazon EC2 instance.
- Mounted Amazon EFS to provide persistent shared storage.
- Created and managed an Amazon S3 bucket for object storage.
- Automated file synchronization between Amazon EFS and Amazon S3 using Linux shell scripting and the AWS CLI.
- Strengthened practical skills in AWS cloud infrastructure, Linux administration, storage services, and automation.

Highly Available Web Application using AWS

- Deployed a highly available web application using Amazon EC2, Auto Scaling Group (ASG), and Application Load Balancer (ALB).
- Configured Auto Scaling policies to maintain application availability under varying workloads.
- Implemented Amazon CloudWatch monitoring and alarms to track instance health and performance metrics.
- Integrated Amazon SNS with CloudWatch to send real-time email notifications for critical events.

CI/CD Pipeline for Java Web Application Deployment using Jenkins.

- Designed and implemented a CI/CD pipeline to automate the build and deployment of a Java web application.
- Integrated GitHub, Jenkins, Maven, and Apache Tomcat to achieve continuous integration and automated deployment.
- Configured Jenkins Pipeline to automatically pull source code from GitHub upon code commits.
- Built the application using Apache Maven and generated a deployable WAR file.
- Automated deployment of the WAR file to Apache Tomcat using Tomcat Manager.
- Reduced manual deployment effort, ensured faster software delivery, and improved deployment consistency.

CI/CD Pipeline Automation for Java Web Application Deployment using Docker.

- Designed and implemented a CI/CD pipeline using Jenkins to automate the build and deployment of a Java web application.
- Integrated GitHub with Jenkins to retrieve the latest application source code and used Maven to compile, test, and package the application into a WAR file.
- Created a Dockerfile using Apache Tomcat as the base image and packaged the generated WAR file into a Docker image.
- Automated Docker image creation and container deployment through the Jenkins pipeline, eliminating manual application deployment.
- Configured Docker port mapping to expose the containerized application and verified application availability through the browser.
- Implemented container lifecycle management by stopping and removing the previous container before deploying the latest version.

Certification

Completed **AWS & DEVOPS** course from BOLT ACADEMY.

MARCH 2026 – AUG 2026.

Education

Master of Computer Science (M.Sc. CS)	2021 - 2023
Sri Krishna Arts and Science College	
CGPA: 8.4	
Bachelor of Computer Science (B.Sc. CT)	2018 – 2021
Sri Krishna Adithya College of arts and science.	
CGPA: 7.7	

Work Experience

JANATICS INDIA PRIVATE LIMITED	
Corporate Planning Trainee	Nov 2024 – Aug 2025
INDOSHELL CAST PRIVATE LIMITED	
Marketing And Costing	Oct 2023 – Nov 2024
